Job Experience

Sogeti

Principle Engineer May 2021 - Present

Implemented an automated testing system using Cypress and Github actions. Created a SvelteKit based CMS using an existing Java microservice backend, with AWS Amplify for authentication. Built an Electron based Svelte application for Linux based kiosks for file and video viewing.

Built a modern React v17 app using Material UI 5, AWS Cognito for authentication, and utilized a Java Spring-based microservice backend. Deployed private NPM packages for use on multiple internal projects. Converted aging WordPress system into NextJS and deployed to AWS.

Lennox International 5 years 2 months

Lead Front-End Developer March 2019 - April 2021

Leading the Ecommerce and Digital Experience front-end development team as well as provide technical consultation on new projects and initiatives throughout Lennox. Helped brainstorm and plan new applications. Advocate for modern technology stacks like JAMstack and a return to the web's HTML roots with NodeJS 11ty framework.

Front-End Developer March 2016 - March 2019

Created multiple new apps. Helped launch a new eCommerce platform on Hybris. Migrated the old sharepoint-based website

Certifications

Certified ScrumMaster (CSM)

Scrum Alliance

Education

Bachelor of Science: Applied Behavior Analysis

into the new Hybris website. Built up a team of developers in the process, and brought the company's technology stack into the modern coding standards.

Sally Beauty 3 years 3 months

Front End Developer January 2013 - March 2016

Worked on application building for promotions, store locating, programs, and events with third party companies. Built standalone websites for brands under the Sally Beauty corporate umbrella. I also planned the architecture and development for the Project Runway season 14 website.

Insurance Connection USA 2 years

Front End Developer January 2011 - December 2012

Updated the aging wordpress installation to a modern, plugin-less wordpress platform. Handled all the front-end development for promotions, and applications. Kept the website documentation up-to-date with the ever-evolving insurance laws.

Open Source & Community Efforts

Open Source: Celestial - PHP Framework

Built and maintained Celestial over three years with a team of developers.

Open Source: Celestial Lite - NodeJS Framework

Built and maintained Celestial Lite, the NodeJS Framework, over one year with a team of developers.

Community: Active in the Eleventy discord group

Frequently assist developers with website issues on NodeJS and Eleventy and actively contribute articles to Dev.To

Community: Publishing on Dev.To

Published tutorial articles on the NodeJS framework, Eleventy, and continue to help push its adoption on the web.
